# Community College of the Air Force (CCAF) Fact Sheet

## The Only Regionally Accredited College Amongst All Branches of the Armed Forces

The CCAF was activated in 1972 to gain academic recognition for technical training conducted by Air Force schools. CCAF awards the associate in applied science (AAS) degree to enlisted members of the active duty Air Force, Air National Guard, and Air Force Reserve Command. Degree programs are designed to help students meet future technological and leadership challenges of the Air Force by combining Air Force technical training with general education course work from accredited civilian schools. Since military personnel are constantly relocating in performance of their duties, CCAF provides a means for them to complete degree requirements regardless of where they are assigned.

**CCAF is the largest community college in the world and is the only community college in the DoD. To date, the college has awarded more than 392,000 AAS degrees to Air Force Personnel.** The administrative center is located at Maxwell-Gunter AFB AL. More than 5,700 instructors in more than 100 affiliated schools teach degree-applicable courses. Each year more than 1.6 million semester hours are earned in CCAF classrooms. To date, the college has awarded more than 392,000 AAS degrees.

**CCAF offers 68 degree programs in five general areas: (1) logistics and resources, (2) public and support services, (3) allied health, (4) electronics and telecommunications, and (5) aircraft and missile maintenance.** Individuals may only participate in degree programs designed for their Air Force occupation. CCAF also develops programs and other academic credentials that offer professional certification and recognition opportunities.

**Enlisted personnel are automatically registered in a degree program designed for their AFSC during basic military training.** Each degree program consists of 64 semester hours and combines Air Force education and training with a core of general education requirements obtained from civilian colleges and universities or through nationally recognized examination programs. Along with the 64 semester hours, students must hold a journeyman (5-skill) level at the time of program completion and have a minimum of 16 semester hours of CCAF residency applied to their degree program. Residency is defined as credit earned in a CCAF-affiliated school. Table 12.1 identifies the requirements for the typical CCAF degree, the number of semester hours required in each area, and general information on the courses that fulfill those requirements.
